Issue #05-002 – Some technicians will face significantly longer commutes once the new CSMS opens. What will be the guidelines on geographical job displacement? (early out, paid pcs, transfer to other shops, nothing?). Decided that Mgt will do a staff study to id the nature and scope of the issue and also identify and current regs or policies that apply. The LPC will review and determine findings and recommendations to submit to higher.

New Business:

Schedule Change – Reviewed issues surrounding end of mandatory 4-10 work days, consensus reached to continue schedule with minor adjustments.
